

Lower Jordan River Cleanup May 2, 2020

In respect Governor Whitmer's attempts to mitigate the pandemic, the BRCS has asked paddlers to avoid contact, usually unavoidable during vehicle shuttles, during paddles and cleanups. In that spirit, Ron, Jackie and I paddled up the lower Jordan River from Rast Jordan to Rogers Bridge and back in 30 mph winds, cleaning the river as we progressed.

Because the water is so high, directly affected by Lake Michigan and the rains we've had, it was difficult to locate trash in this mostly pristine section. Much love for TAPC and BRCS members. Hopefully, small groups of us can safely keep some of the slower rivers and area lakes clean during these trying times.
